

Appendix B: Detailed correlation of strata between selected key wells in the Wessex area

E. Greenhalgh

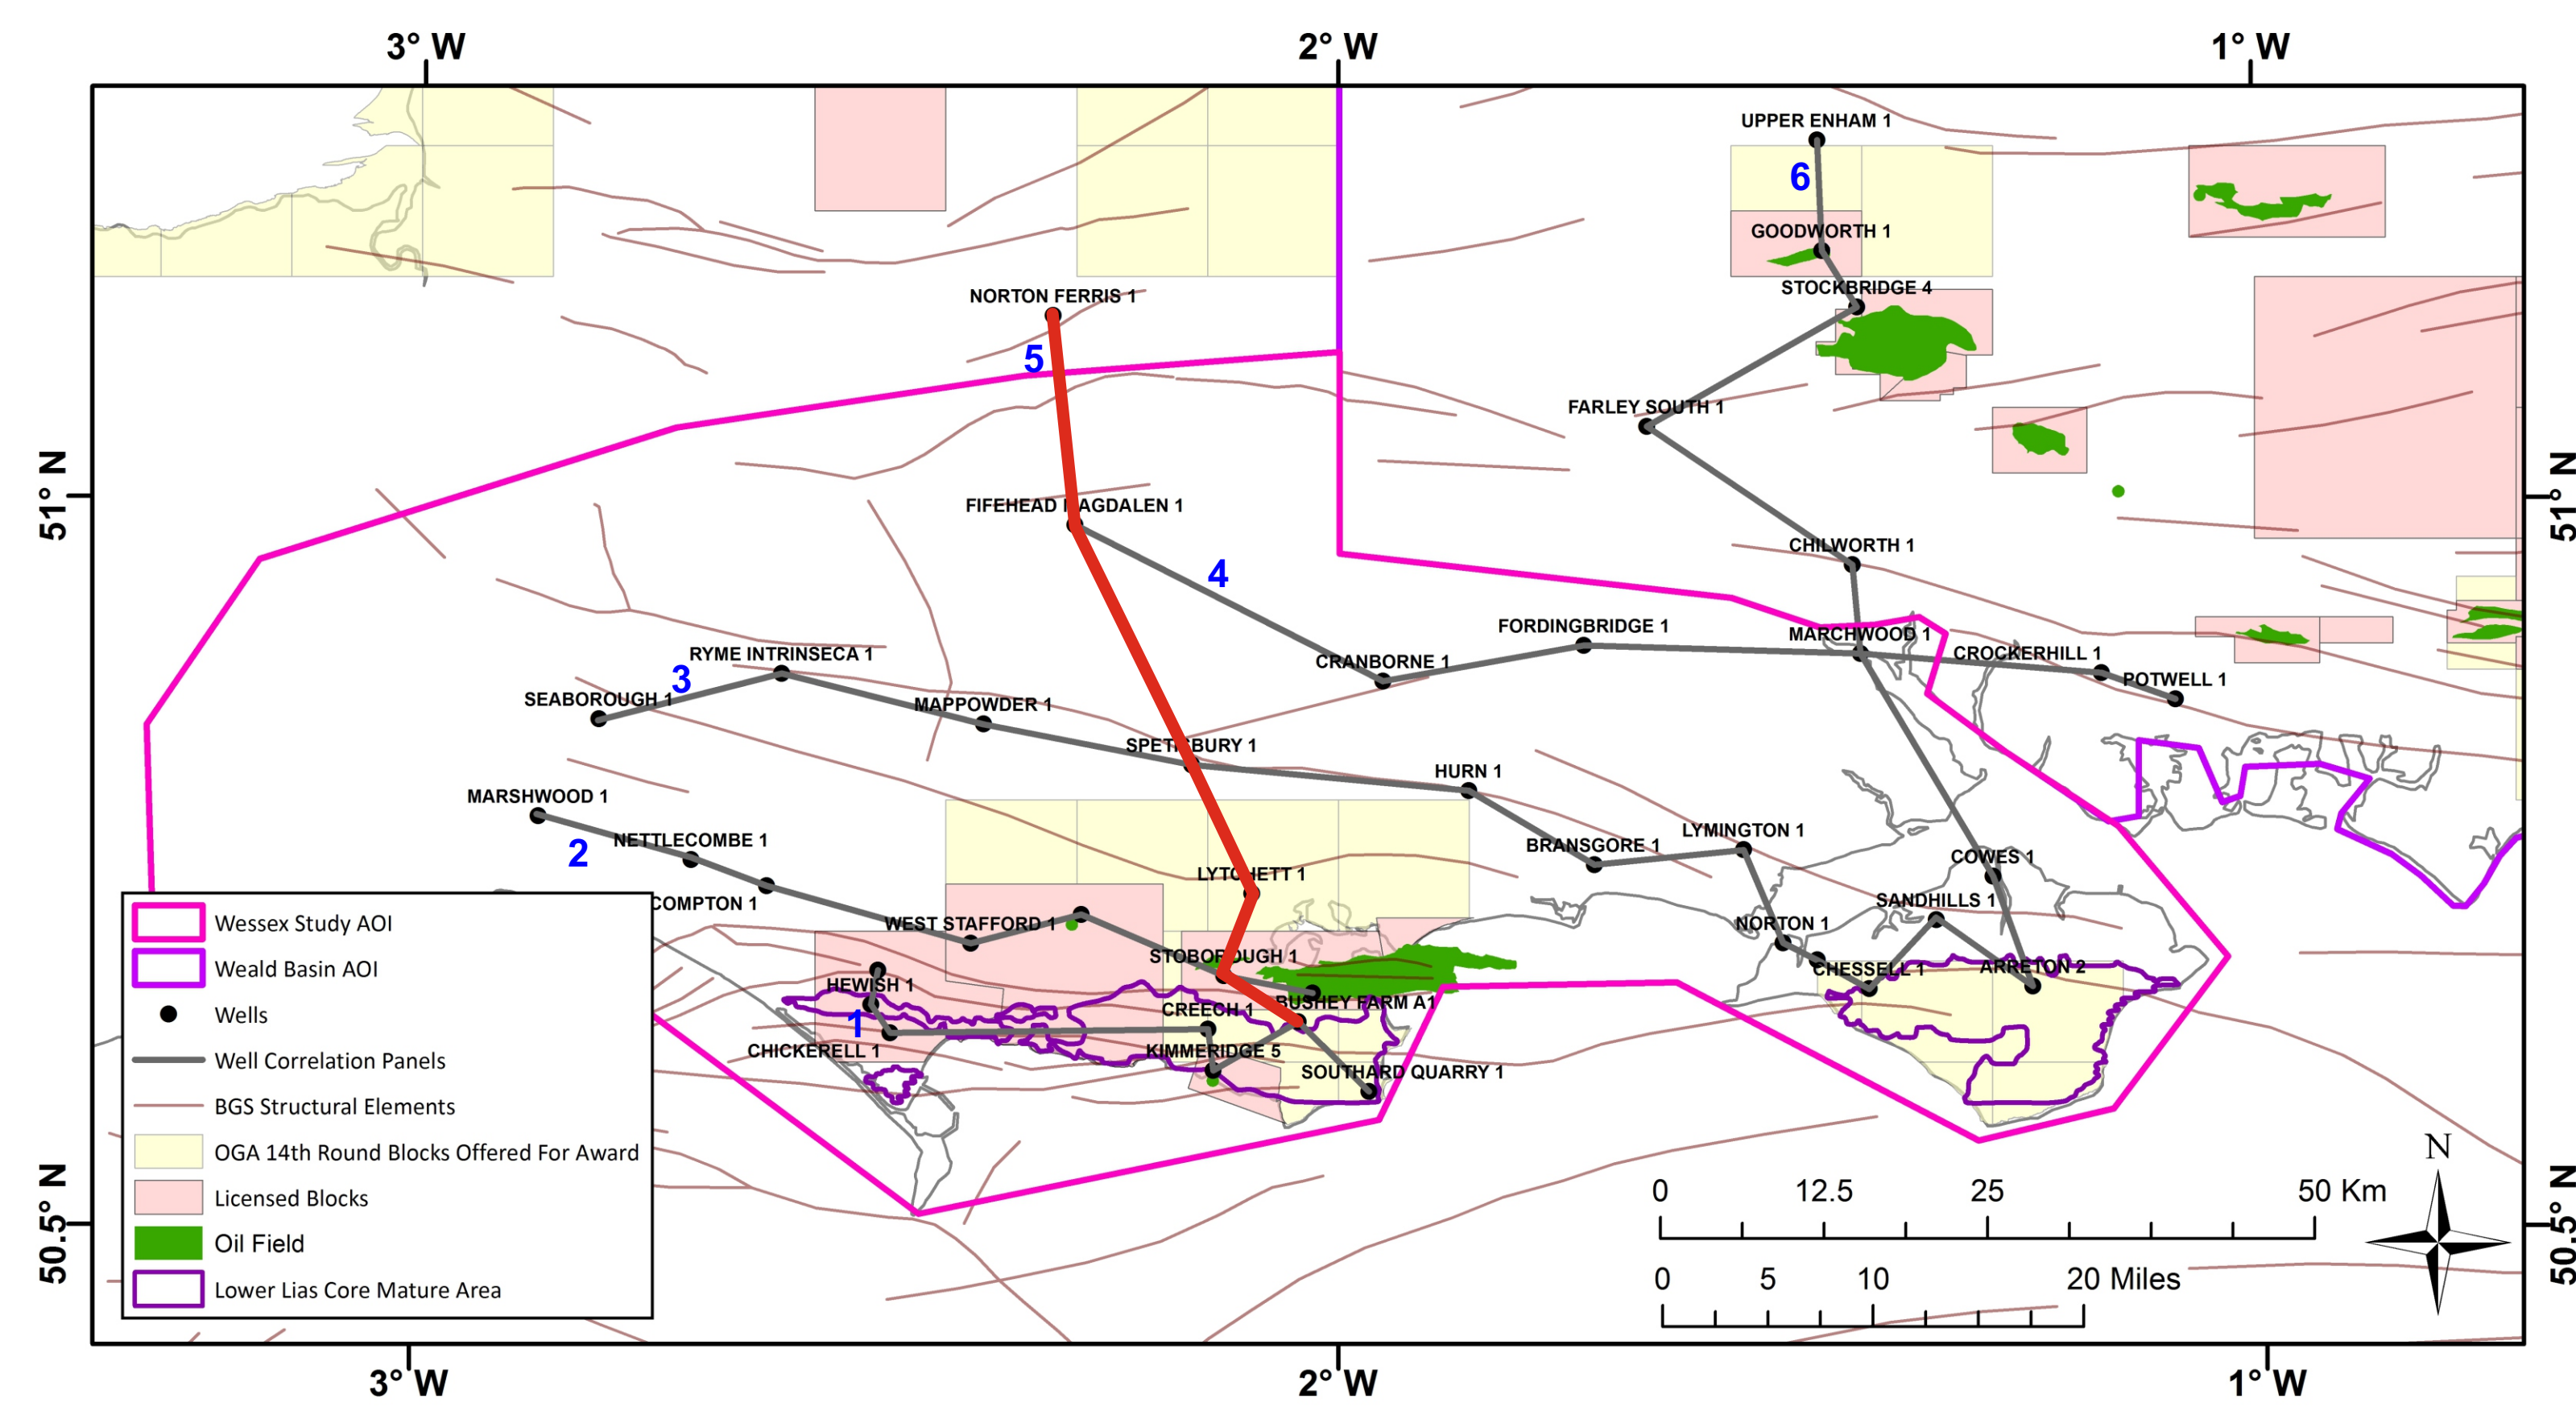

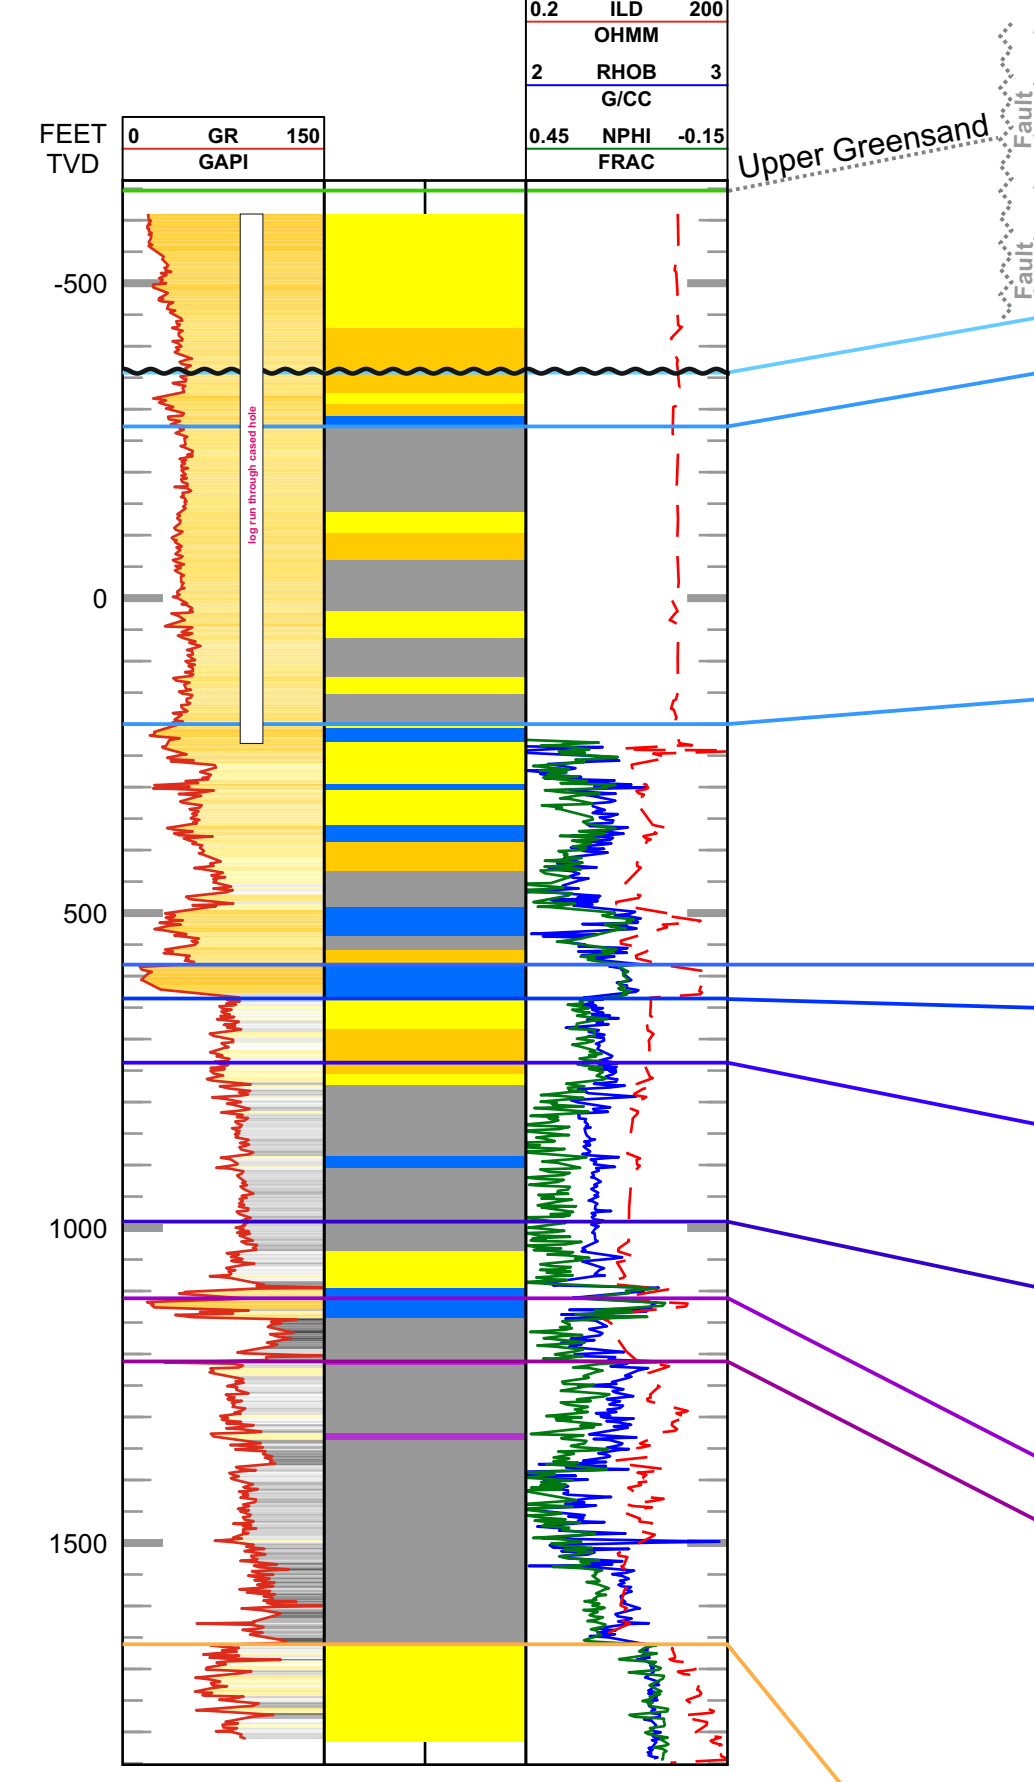

Key

- Siltstone
- Anhydrite
- Sandstone
- Shale
- Halite
- Limestone
- Conglomerate
- Breccia
- Fault
- Base Greensand Unconformity

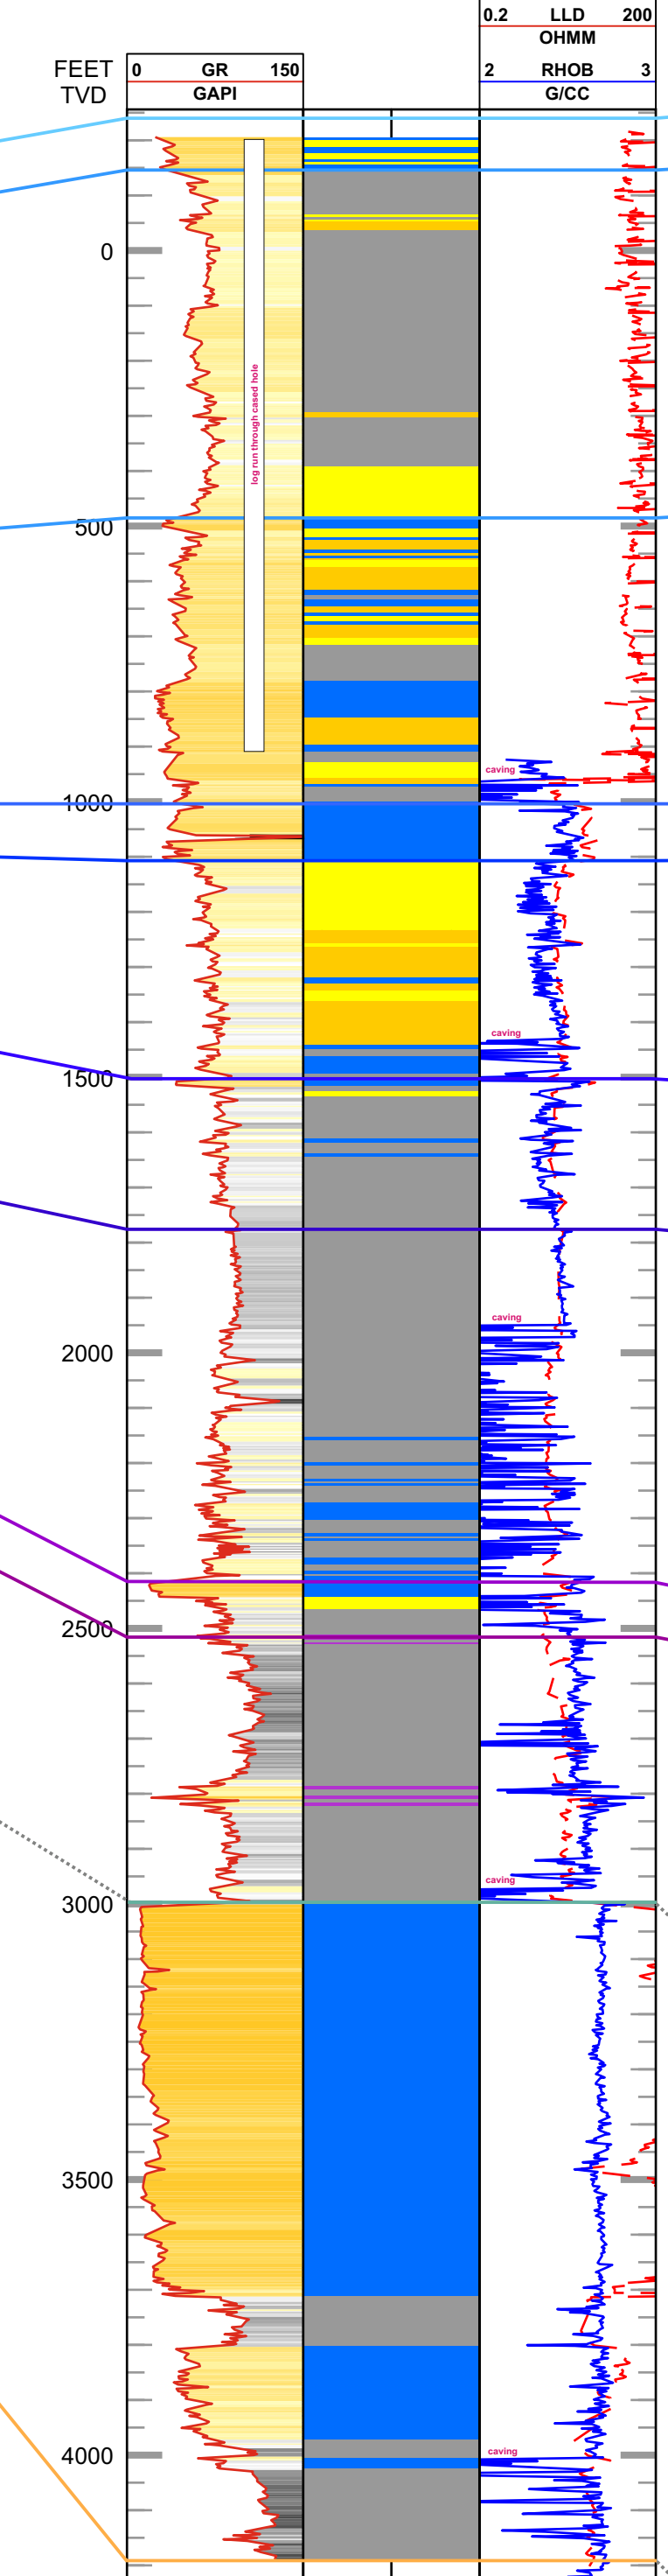

- Well correlations created in DecisionSpace Geoscience
- Lithology information generalised from composite logs
- Gamma ray shading - default in DecisionSpace Geoscience
- Flattened on Top Inferior Oolite
- Picks represent top of the formation

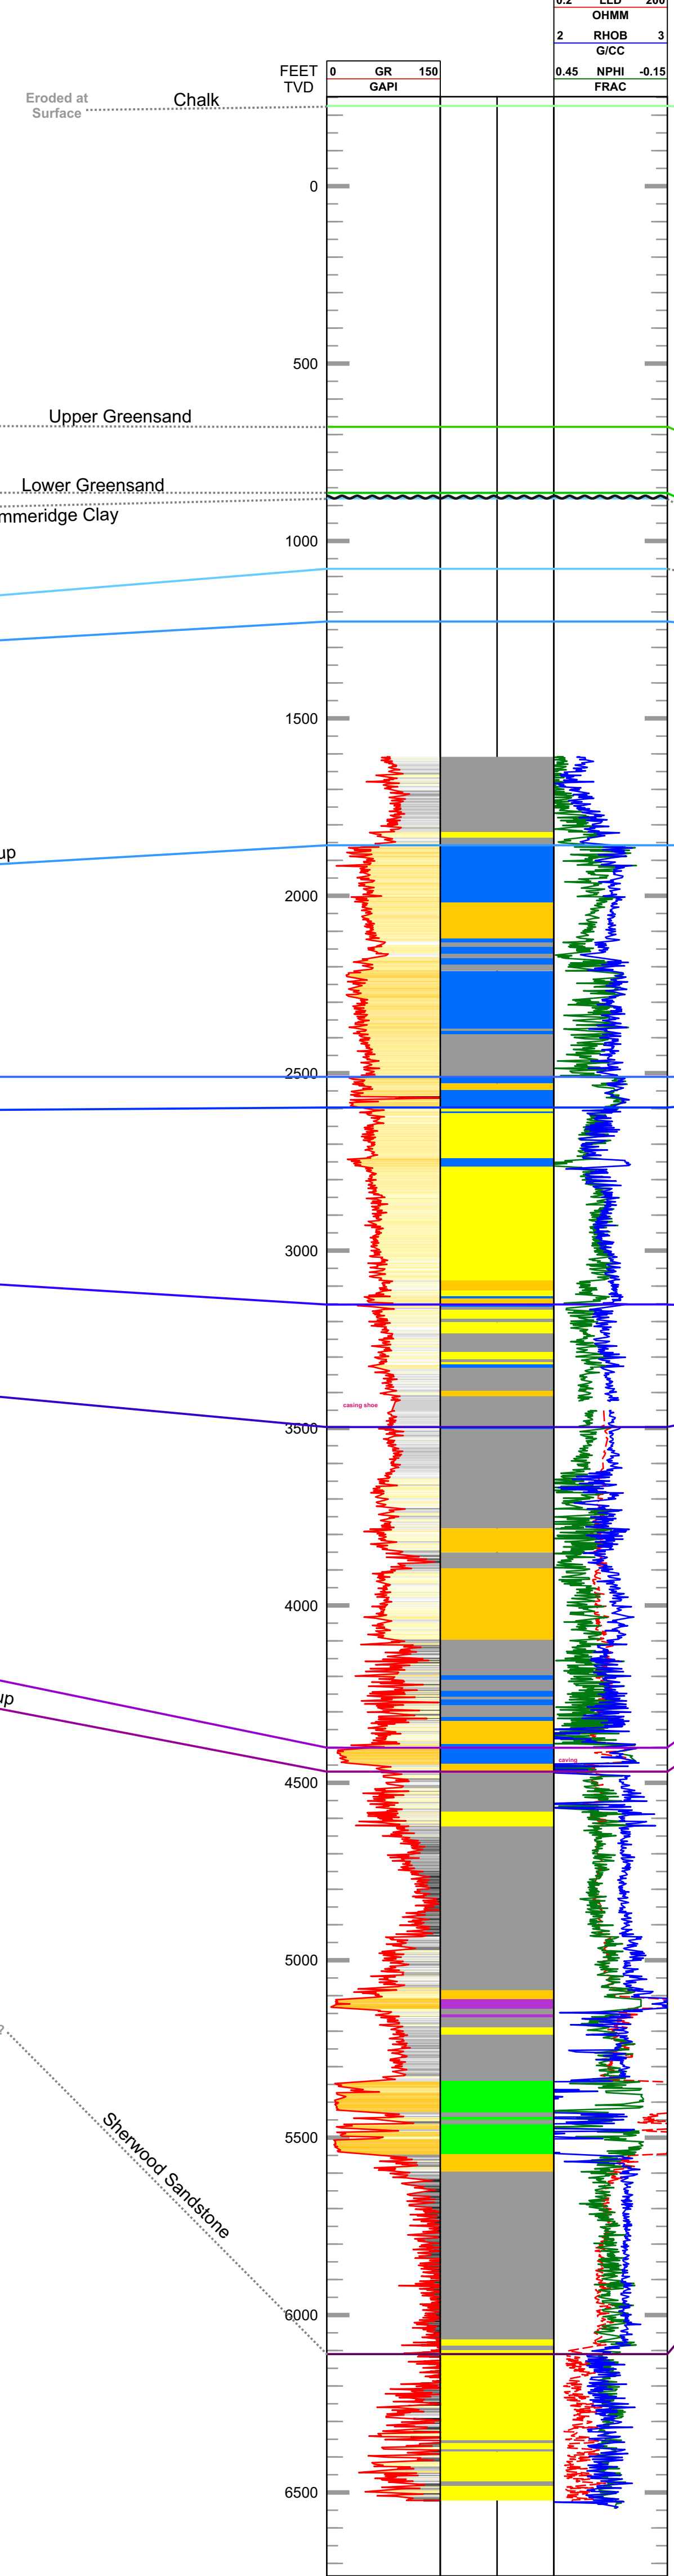

NORTON FERRIS 1

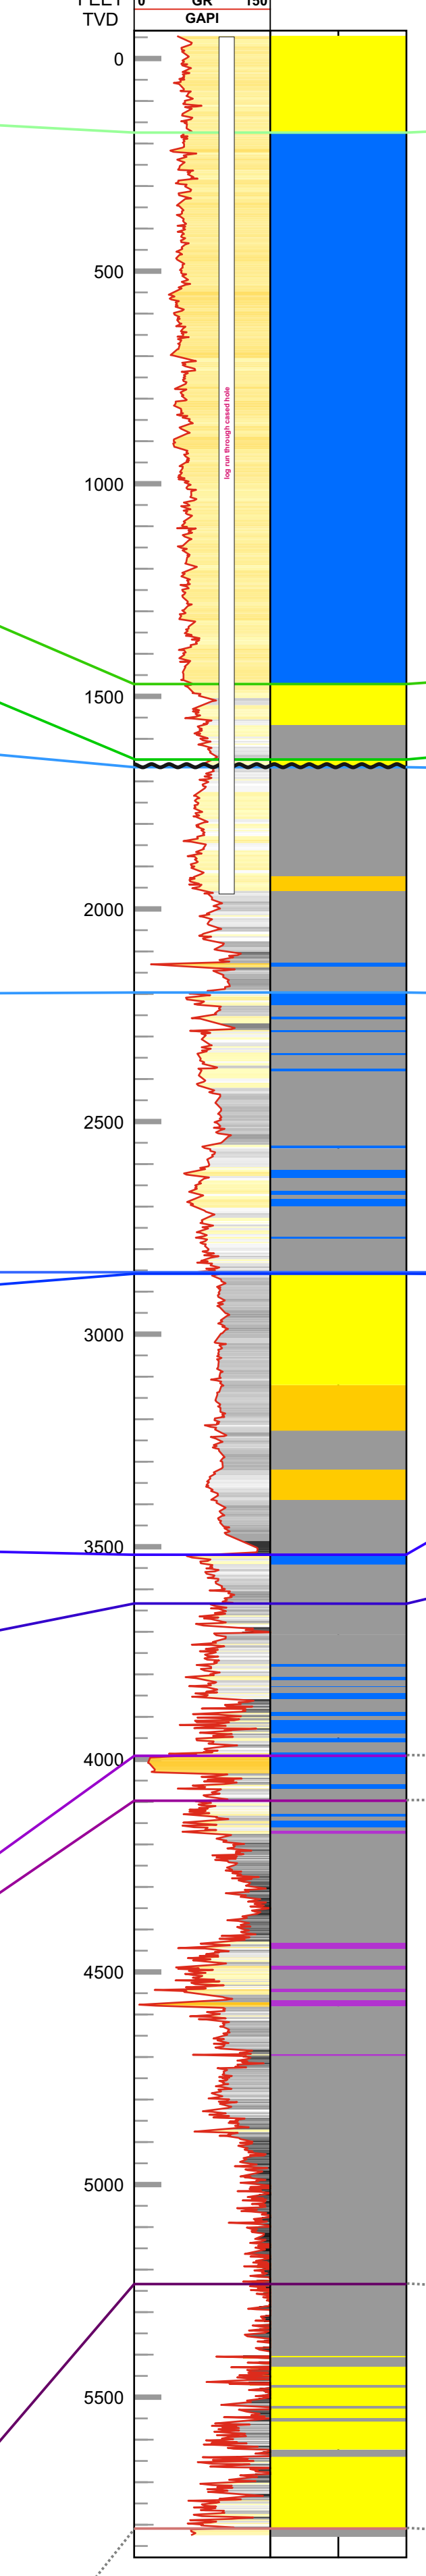

FIFEHEAD MAGDALEN 1

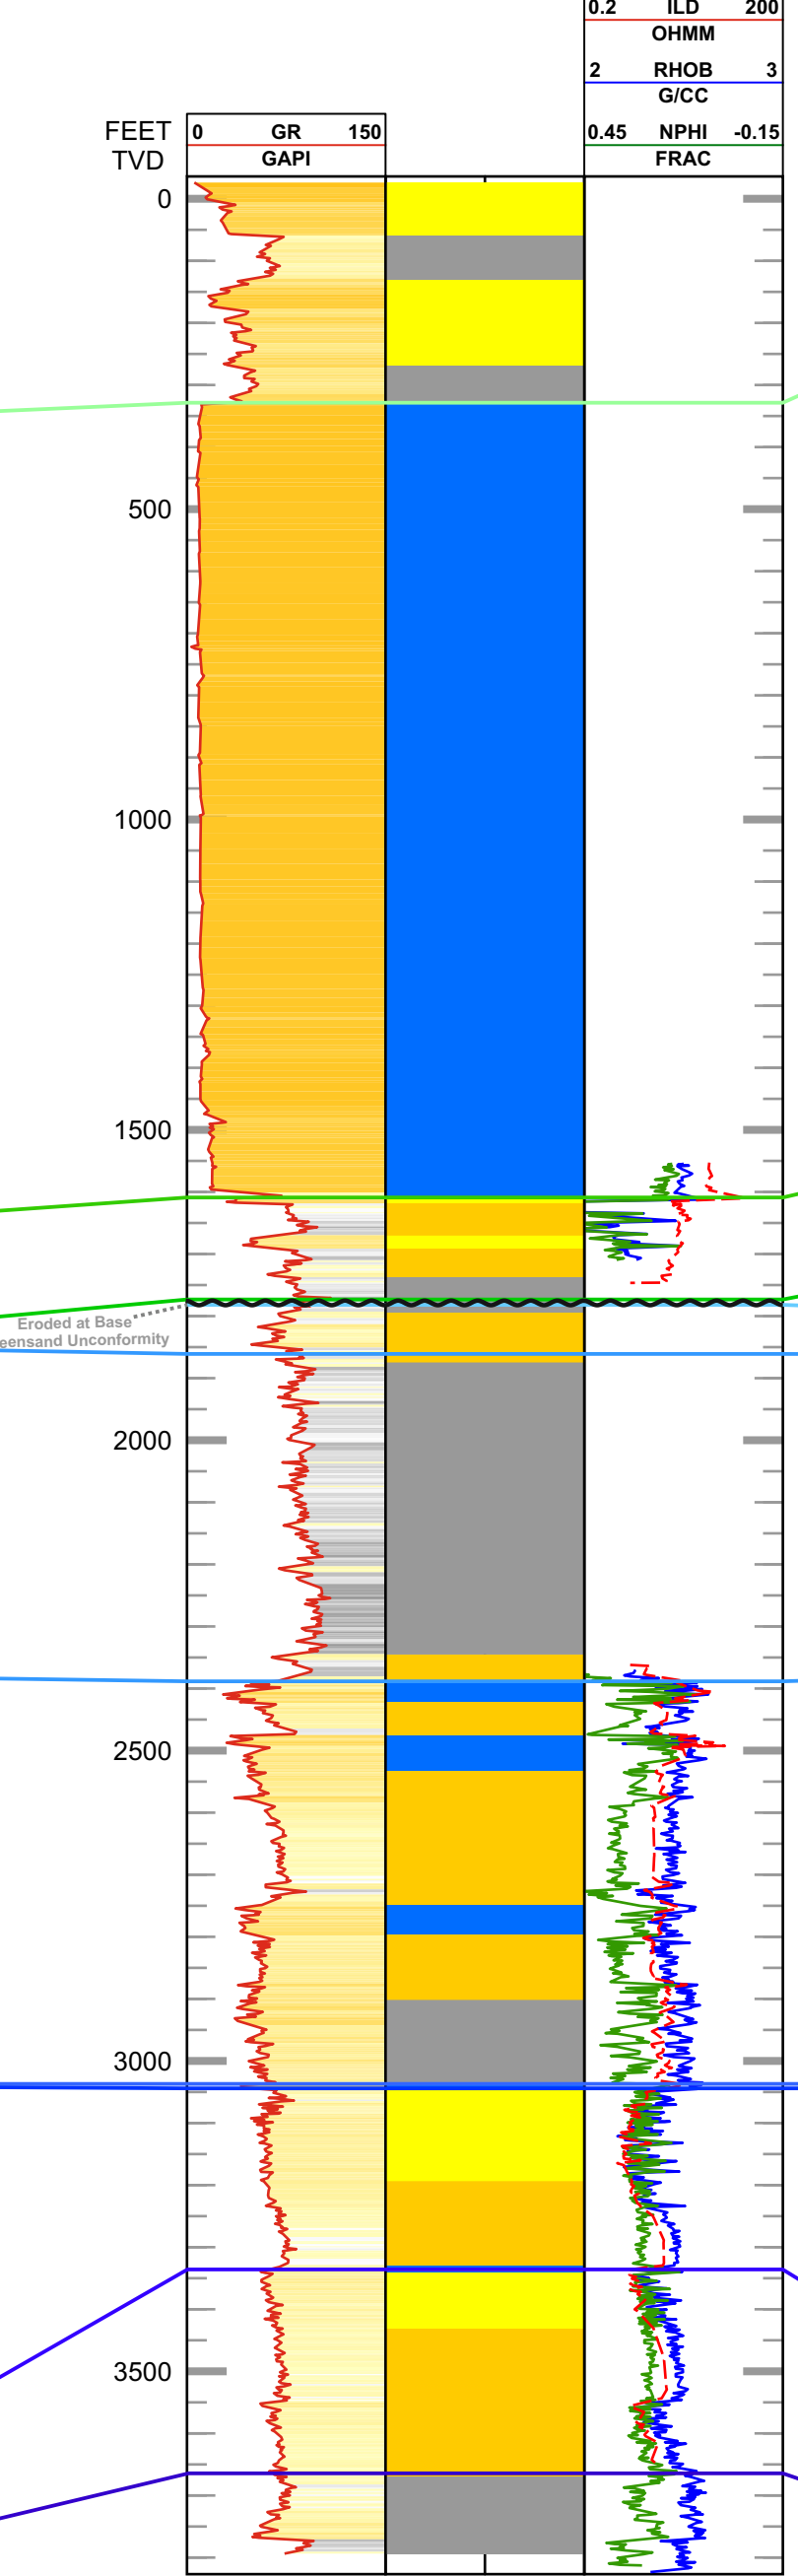

SPETISBURY 1

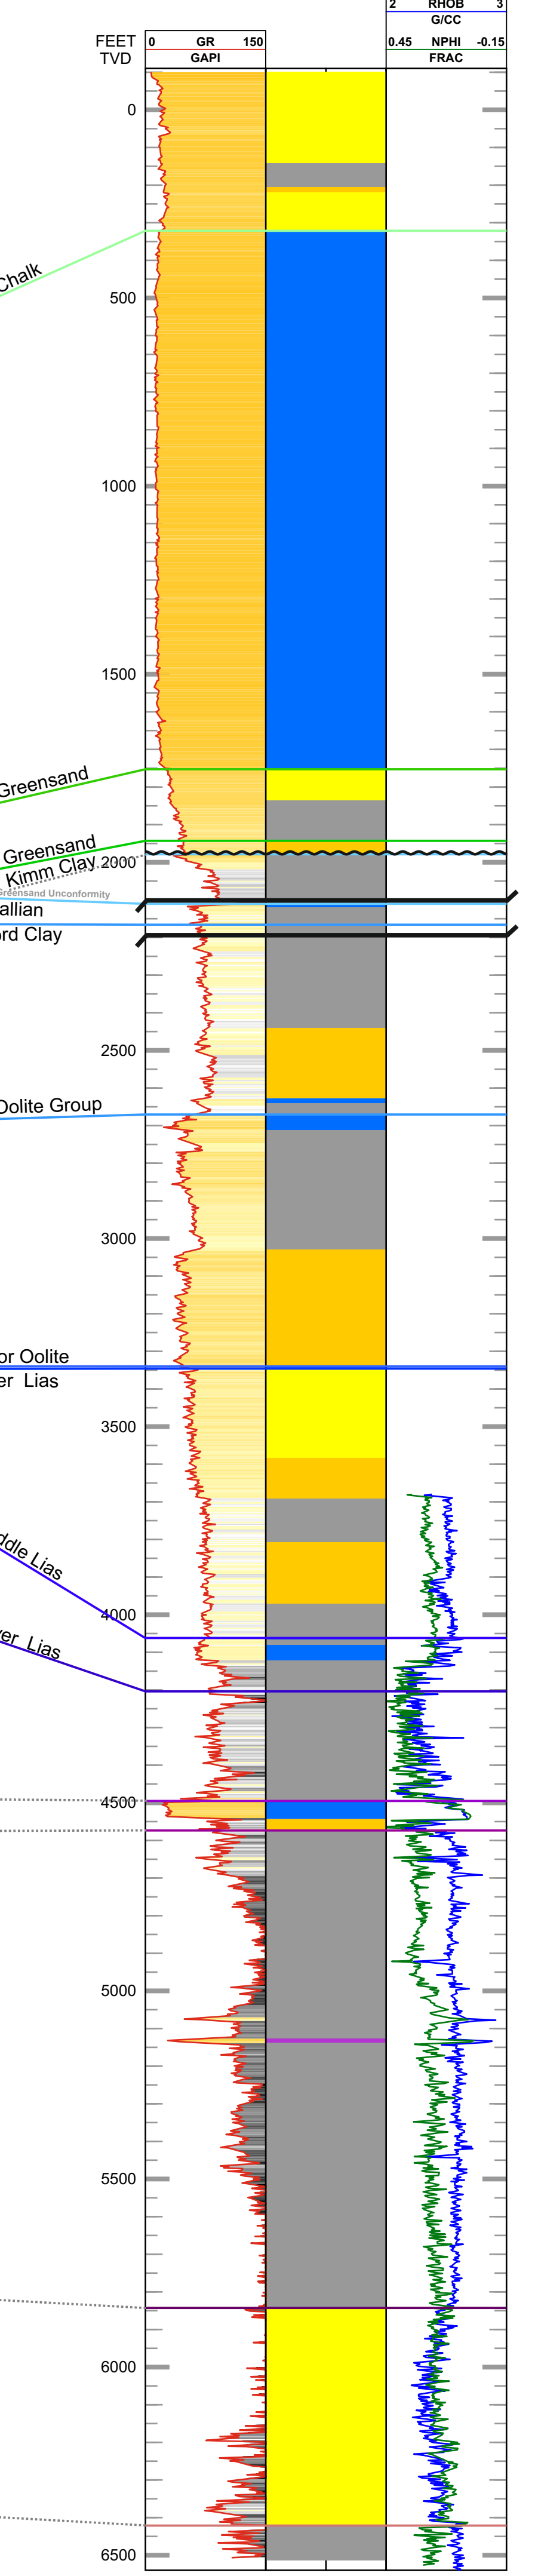

LYTCHETT 1

STOBOROUGH 1

BUSHEY FARM A1

Key

- Siltstone
- Anhydrite
- Sandstone
- Shale
- Halite
- Limestone
- Conglomerate
- Breccia

Fault
 Base Greensand Unconformity

- Well correlations created in DecisionSpace Geoscience
- Lithology information generalised from composite logs
- Gamma ray shading - default in DecisionSpace Geoscience
- Flattened on Top Inferior Oolite
- Picks represent top of the formation
