30th Licensing Round Data Support

A comprehensive data suite to support the licensing round has been prepared. It includes undeveloped discovery data packs, regional maps, ~ 60 discovery montages and seismic survey information.

The following information is available for download and to order on media in support of the 30th Round:

Undeveloped discoveries Data Packs including:

Wells and seismic information on circa 140 offshore discoveries

Individual discovery montages for selected discoveries (circa 60)

Undeveloped discoveries interactive map

The information can be accessed via the OGA data centre and is available in a number of formats:

As a free download from CDA's UKOilandGasData.com system

On memory sticks (5 regional data packages)

On external hard disk (the complete set of data packs, available to buy on UKOilandGasData.com)

In regional Petrel projects (available for download, and through Schlumberger Aberdeen Hosted Services Portal)

The OGA will also be making available additional supporting information, including:

Getech's UKCS satellite gravity & Geostrat's CNS Jurassic stratigraphy report

Joined Well Logs (JDWL) and related curve data

Regional geological maps and databases for the CNS/MF area
